Instruction Manual of Concealed Cistern (Install With Wall Hung Toilet)

480~ 4100

- ent of wall hung toilet:
- Ine measure requirement of wail hung toriet:

 (1). The distance of the two banging hotes' centre is 180mm or 230mm.

 (2). The distance between full hote's centre and flush hote's centre is 135mm

 (3). The distance between flush hote's centre and hanging hote's centre is 100mm.

 (4). The diameter of fill hote is \$52mm-\$58mm.

- (5). The outer diameter of flush hole is \$80mm \$\phi\$ 100mm.

 (6). The diameter of hanging hole can't less than \$20mm.

 (7). The height from the top surface of wall hung tollet to the floor is 400mm (10mm more or less).

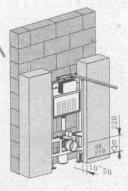

Attention: The wall which is installing the concealed distern can be brick beton; keel frame+plasterboard; keel frame+beaverboard;wooden frame

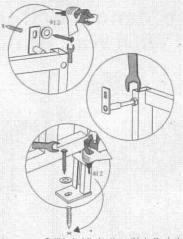

68

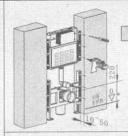

Adjust the adjustable poles longer or shorter

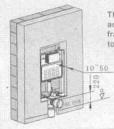

Adjust the balance and measure of steel frame, make mark on the position of drill hole.

Drill hole hit plastic nail into the hole. fix the steel frame by screw

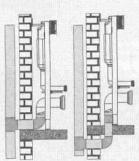

The fix way of 009H can adopt enchase angle iron onto the wall, fix the steel frame onto the angle iron.

The fix way of 009V can adopt fill brick beton or keel frame under the steel frame to support the product.

angle iron

6.Install flush pipe

①pipe installed above the floor ②pipe installed under the floor

Fix the pipe bracket by two screws fix the flush bend pipe by pipe clip.

The flush bend pipe can be turne to suitable position according to requirement.

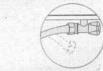

requirement.
The way of connect the flush bend pipe:
HDPE plastic: weld the flush bend pipe by heated steel board, connect the flush bend pipe and flush pipeline by rubber tie-in ABS plastic: amear glue onto the flush bend pipe, connect the flush bend pipe and flush pipeline by rubber tie-in.

7.Install fill water pipe

Connect the fill water pipe with angle iron and connect the metal soft pipe with angle iron

Attention: There may be much dirt in the new pipe, pls repeat open and close the stop valve several times, flush out the dirt by open & close the water source several times, till appear clean water. At the same time, pls wash the dirt in the cistern.

8. Preparative before build wall

insert the two hooks of panel board into the flush valve

Cover the square cover (to prevent the dirty and prevent the deformation)

9. Build the wall

by plasterboard o composite board. Stick tile onto the range of tile thickn is 20mm - 70mm

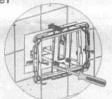

Cut the part which protruding of tile flat with the wall

10.Install cistern panel

The surface of expanding pole is 5mm lower than the wall surface.

Fix the panel frame onto the

Buckle the bottom of cistern panel onto the panel frame, stress the distern panel upward, close the cistern panel onto the panel frame.

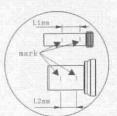

11.Adjust straight pipe

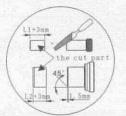

insert the straight pipe into the bend pipe, make mark on the pipe where is balance to the wall.

insert the straight pipe into the hole of wall hung toilet,make mark on the pipe where is balance to the surface of wall hung toilet.

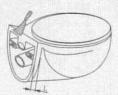

Measure the distance between the two marks

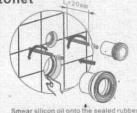

Measure the length of L+3mm at the edge of straight pipe and cut it down. Rub the cut edge of straight pipe by file to make it smooth.

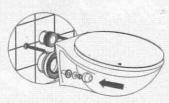

12.Install wall hung toilet

Measure the depth * L* of hanging hole of wall hung toilet, smear small white cement onto the side surface of wall hung toilet. where connecting to the wall.

off bend pipe equally insert straight pipe into the bend pipe. Adjust the length of hanging pole, make the length of outside wall to be L+20mm. Fix the hanging pole

Install the wall hung toilet onto the hanging pole, set decorated ring, gasket, screw & decorated cap onto the hanging pole orderly.

Smear glass glue onto the side of wall hung tollet where connecting to the wall.

13.Install effect
